

GREY BREWER

Greater Denver, CO (303) 406-1055 greybrewer@outlook.com [linkedin.com/in/grey-brewer](https://www.linkedin.com/in/grey-brewer) | github.com/GBrew18

PROFESSIONAL SUMMARY

IT and security professional with hands-on experience administering Windows, macOS, and Linux endpoints across multi-site environments — currently serving as the primary on-site IT admin for a 90-user office inside a 200-user aerospace tech organization running both GCC High and commercial Microsoft 365 tenants. Proficient in Entra ID, Intune, Conditional Access, MFA, and RBAC, with self-directed lab work in SOC operations (Splunk, Suricata, Zeek) and the MITRE ATT&CK framework. CompTIA Security+, Network+, Linux+, and CLNP certified. Targeting SOC, IAM, or senior IT roles where I can contribute from day one.

EXPERIENCE

Red 6 Advanced Projects | IT Support Administrator Nov 2025 - Present

Full-Time · On-Site

- Serve as primary on-site IT admin for a 90-user office within a multi-site aerospace organization (~200 users across distributed locations).
- Administer Windows, macOS, and RHEL endpoints across the full device lifecycle: provisioning, onboarding/offboarding, patching, and EOL replacement.
- Manage Microsoft 365 across GCC High and commercial environments — Entra ID, shared mailboxes, MFA enrollment, RBAC workflows, and Conditional Access policies.
- Deploy and enforce endpoint compliance via Microsoft Intune: policy configuration, app deployment, and device health management.
- Troubleshoot endpoint, identity, access, and network issues using Atera RMM, PowerShell, SSH, and Cisco Talos.
- Conduct phishing investigations, suspicious-activity escalation, access revocation workflows, and privileged access verification (AutoElevate).
- Coordinate local incident response during power, network, and infrastructure outages to maintain business continuity.
- Author and maintain onboarding docs, SOPs, and KBA articles to drive operational consistency.

IDR, Inc. → Sierra Nevada Corporation | IT Consultant Jul 2025 – Nov 2025

Full-Time · On-Site

- Delivered responsive desktop support tracked in ServiceNow against defined SLA targets.
- Configured and maintained conference rooms and AV systems for internal and DoD-aligned briefings.
- Resolved workstation, network, and peripheral issues across a large, complex enterprise environment.
- Used SCCM for imaging, software deployment, and patching to maintain system compliance.
- Contributed to internal documentation and cross-functional process improvements.

SEAKR Engineering — An RTX Company | IT Support Specialist Mar – Jul 2025

Full-Time · On-Site

- Delivered technical support across Windows, Linux, and Solaris environments via phone, email, and in-person.
- Administered Active Directory: account creation, password resets, group memberships, and access control.
- Performed network troubleshooting across DNS, DHCP, and routing; managed software/firmware patching.
- Authored Bash and Batch scripts to automate routine system tasks; tracked requests in Request Tracker (RT).

Stryker Site Services | IT Support & Data Entry Technician May 2024 – Mar 2025

Part-Time · Independent Contractor

- Performed full Windows 11 upgrade across primary workstations; executed a 2 TB OneDrive backup.
- Implemented YubiKey 2FA to meet T-Mobile security requirements; upgraded hardware and built dual-monitor workstation.
- Supported T-Mobile's VDI environment and resolved software, hardware, and peripheral issues on-call.

CYBERSECURITY TRAINING & PROJECTS

University of Denver Cybersecurity Boot Camp *Sep 2024 – Mar 2025*

24-week intensive program covering systems administration, network security, SIEM, and offensive security.

- Security fundamentals: CIA triad, governance frameworks, disaster recovery planning, and risk analysis.
- Systems administration: Linux/Windows server hardening, Active Directory, Kerberos, Bash automation.
- Network security: secure architecture design, Wireshark traffic analysis, cryptographic controls, port scanning.
- Defensive security: Splunk SIEM, incident response planning, forensic investigations, and evidence preservation.
- Offensive security: Burp Suite, Metasploit, Zenmap, Searchsploit — SQL injection, XSS, file inclusion, webshell deployment, and network pivoting.

Pi-Based Network/Security Monitoring Cluster (Homelab) *Nov 2023 – Present*

Multi-node Raspberry Pi cluster deployed as a modular SOC environment for threat detection and traffic analysis.

- Configured VLANs on a managed TP-Link switch to isolate monitoring traffic from the home network.
- Deployed Suricata IDS/IPS for live traffic inspection and alert forwarding to a centralized SIEM.
- Integrated Zeek for deep traffic analysis — DNS, SSL certificates, and anomalous connection profiling.
- Containerized services with Docker for log forwarding and persistent retention across reboots.
- Planned: Splunk SIEM aggregation, Cowrie/Dionaea honeypots, and Kubernetes orchestration for cloud security parity.

TryHackMe — Offensive Security Labs

12+ hands-on labs across web exploitation, offensive tooling, and post-exploitation.

- Web: OWASP Top 10 (2021), SQL Fundamentals, JavaScript Essentials, Web Application Basics.
- Tooling: Burp Suite, Hydra, Gobuster, SQLMap; shells (bind/reverse/web), Metasploit + Meterpreter.
- Full Windows 7 SMB exploit (Blue); CVE-2024-21413 — Outlook credential leak via Protected View bypass.

OTHER EXPERIENCE

Compri Consulting | Technical Recruiter Jul 2022 – Sep 2024

Promoted from Technical Sourcer (Jul 2022) · Position eliminated due to market downturn

- Ran full-cycle IT recruiting across software, infrastructure, QA, PM, and analyst roles.
- Sourced 10+ placements within the first 6 months as Technical Sourcer.
- Used Dice, LinkedIn Recruiter, Bullhorn ATS, and MS Office suite.

Valley Country Club | Golf Operations Supervisor & Lead Junior Instructor Feb 2016 – Jul 2022

- Led Junior Golf curriculum for multiple seasons; mentored and developed other instructors.
- Managed scheduling, presentations, and scorekeeping with MS Office; maintained POS systems.

EDUCATION & CERTIFICATIONS

CompTIA Security+ (Self-Study)	Jun 2025
CompTIA Network+ (Self-Study)	Mar 2025
CompTIA Linux+ (Self-Study)	Jun 2024
CompTIA CLNP (Self-Study)	Mar 2025
University of Denver — Cybersecurity Boot Camp	Sep 2024 – Mar 2025
Tabor College — Coursework in Psychology & English	2020 – 2021
Embry-Riddle University — Coursework in Aerospace Engineering	2018 – 2019

TECHNICAL SKILLS

Operating Systems	Windows 10/11, Windows Server, RHEL, CentOS, Ubuntu, Fedora, OpenSUSE, MacOS
IAM & Identity	Microsoft Entra ID (Azure AD), Active Directory, Conditional Access, MFA, RBAC, Kerberos, SSO
Endpoint & MDM	Microsoft Intune, SCCM, Atera RMM, AutoElevate, Group Policy
Cloud & M365	Microsoft 365 (GCC High & Commercial), VDI, OneDrive, Teams
Security Tools	Splunk, Wireshark, Zeek, Suricata, Burp Suite, Metasploit, John the Ripper, Cisco Talos
Frameworks	MITRE ATT&CK, OWASP Top 10, NIST CSF, CIA Triad
Scripting & DevOps	PowerShell, Bash, Batch, Python (basic), Docker, Ansible, cron
Networking	TCP/IP, DNS, DHCP, VLANs, IDS/IPS, packet capture, port scanning, routing
ITSM	FreshService, ServiceNow, Request Tracker (RT)
Hardware	Raspberry Pi cluster builds; UART, JTAG, SPI interface familiarity
